

The disclosure of the mother of Zahra Jalilian, a physics genius, about her suspicious death in the Technical College

The disclosure of the mother of Zahra Jalilian, a physics genius, about her suspicious death in the Technical College

In women's news , articles June 14, 1402

Zahra Jalilian had told her mother only two nights before the accident that she had made a discovery that would win the Nobel Prize in Physics

Seven months after [the suspicious death](#) of Zahra Jalilian, an elite student of the Tehran Technical University and a physics genius, her family and lawyer told the government newspaper "Etimad Online" that the university declared suicide as the cause of death without proof, and even though the building has 13 security cameras, no footage was ever recorded. He did not show us the cameras

Zahra Jalilian, 32 years old from West Islamabad, was an elite student of the PhD course in electrical engineering at the University of Tehran, and was one of the inventors and innovators in the field of nanoelectronics. He completed the defense of his doctoral dissertation and the comprehensive exam with a GPA above 19.50. Zahra Jalilian was the judge of .30 international articles abroad

He had many invitations and e-mails sent from Europe. All these evidences indicated the recognition of this national capital by foreign countries, more than domestic scientific centers. Zahra Jalilian received a scholarship from Germany

On December 11, 1401, Zahra Jalilian entered her private office at 8:30 a.m., and at 10:30 a.m. the same day, she was taken to Shariati Hospital on Kargar Street by the emergency forces on a stretcher. [This physics genius died](#) after a few hours in the hospital

Statements of Zahra Jalilian's brother

Zahra Jalilian's family says that in the meantime, before her death, the officials of the University of Tehran rashly and without having reliable sources, through various interviews, declared the cause of the accident to be suicide, and the incident was reported to the media very quickly

Zahra's brother says: "The problem is that security and university officials say; We do not have the video cameras. There is no witness to testify that Zahra committed suicide. Next to the entrance of the building is a room where the security forces are. The security force also says; At that moment, he was not in his room and had gone to another floor to pour tea. Everything has gone hand in hand to declare without any evidence; My sister threw herself from the ground floor to the basement

The height of the ground floor to the basement is almost three meters. Zahra fell with a height of 165 and suffered so many injuries? Forensic reports show that the spleen was ruptured. [The spleen](#) is not a part that is easily injured or torn. The project that Zahra was working on was a very important project. However, Zahra was also active in other projects

Of course, we believe that Zahra was murdered and we have no doubt about it. Only the cause of the murder and the person or persons who committed this act have not been determined for us. "According to forensic reports, there were scratches on my sister's hand, but the university does not intend to clarify the issue and so far there has been no cooperation from the university with various organizations

Statements of Zahra Jalilian's mother

Her mother also said in a letter: "Our daughter was a happy and extremely intelligent person from childhood. We never remember that hardships and difficulties discouraged him from doing anything. upside down; The bigger the obstacles, the more he tried. He valued his thoughts and actions... After successfully completing his master's degree, he was able to complete the field of solid state physics... He could have entered the field of solid state physics without an entrance exam, but he passed the entrance exam and was ranked first in ...the field of nanoelectronics. He was accepted... He was able to finish his PhD in nanoelectronics in three semesters and referee 35 international papers

In the month of August, 1400 articles by Zahra were approved on a subject that all the world's scientists had a challenge on and were unable to solve. It caused his work to stop for a .while... Finally, his article was accepted in the most prestigious international publication. Zahra had made an important discovery, but her happiness soon ended with her death

Forensic medicine confirms the effects of blows to the abdomen, sides and strong blows to the head and lumbar vertebra, as well as **strong blows to the liver and kidney and rupture of the spleen**. That building has 13 cameras, but the security of the university never showed us the footage of the cameras, and they told the judicial authorities that the cameras had been broken for several months and they did not record any footage. Two nights before the incident, Zahra told us and one of her friends: "I made a discovery that will win the Nobel ".Prize in Physics." I am afraid that if someone finds out, they will take it from me by force or they will do harm to me

Mother of Zahra Jalilian Exposes the Suspicious Death of the Physics Prodigy

The Family of Zahra Jalilian Questions Suspicious Death of the Physics Prodigy

June 4, 2023 in Articles, Women's News

Share on Facebook

Share on Twitter

Pin LinkedIn

Zahra Jalilian had told her mother: 'I have made a discovery that could win the Nobel Prize in Physics.'

Seven months after the suspicious death of Zahra Jalilian, an elite student at the Faculty of Engineering at Tehran University and a physics prodigy, her family and lawyer told the semi-official newspaper "Etemad Online" that the university had declared the cause of death as suicide without any evidence. Despite having 13 cameras in the building, security never showed them the footage from the CCTV.

Zahra Jalilian, 32, from Eslamabad-e Gharb, was an outstanding student in the doctoral program of electrical engineering at the University of Tehran and a pioneer in nanoelectronics. She successfully defended her doctoral thesis and comprehensive examination with a GPA of 19.50 (out of 20). Zahra Jalilian was responsible for reviewing 30 international papers abroad.

She received many invitations and emails from European countries, indicating that her national significance transcended beyond the boundaries of domestic scientific institutions. Notably, she received a prestigious scholarship from Germany.

On December 2, 2022, at 8:30 a.m. Zahra Jalilian entered her office, and at 10:30, she was taken by an ambulance to Shariati Hospital. This physics prodigy **passed away** after a few hours at the hospital.

Remarks by Zahra Jalilian's brother

The family of Zahra Jalilian states that the Tehran University officials, hastily and without reliable sources, declared the cause of the incident suicide through various interviews with the media. They did so even when she was still alive and had not yet passed away.

The brother of Zahra Jalilian says: "The problem is that the university authorities and security claim that they don't have the footage from the cameras. There are no [redacted] ed suicide. There is a small room next to the building's entrance where security personnel are present. The security personnel themselves say that at that moment, they were not in their room but had gone to another floor to bring tea.

"Everything happened such that they announced without evidence that my sister threw herself from the ground floor to the basement. The height from the ground floor to the basement is approximately three meters. How could Zahra, with a height of 165 centimeters, sustain such severe injuries from the fall? The forensic medical reports indicate a ruptured spleen. The [spleen](#) is not a part that is easily injured or ruptured.

"Zahra was working on a critical project, although she was also involved in other projects. It is evident that Zahra was murdered, and we have no doubt about it. The only thing that remains unclear is the motive behind the murder and the person or persons responsible for it. According to the forensic medical reports, there were scratches on my sister's hands. Still, the university does not intend to investigate the matter. There has been no cooperation from the university with various organizations so far."

Remarks by Zahra Jalilian's mother

Zahra Jalilian's mother wrote in a letter: "Our only daughter was an exceptionally bright and joyful girl from her early childhood. We can never recall when difficulties and challenges discouraged her from pursuing a task. On the contrary, she put in even more effort and determination as the obstacles grew. She held great value in her thoughts and actions.

"After completing her Master's degree, she completed her studies in solid-state physics. She could have pursued a Ph.D. in solid-state physics without taking the entrance exam. Still, she decided to take the exam and was accepted with the top rank in nanoelectronics. She completed her Ph.D. in nanoelectronics in just three semesters and reviewed 35 international papers.

"In July 2021, Zahra's article on a subject that posed a challenge to scientists worldwide and had remained unsolved was approved. Despite this achievement, the situation did not progress as desired. The device she used to analyze her samples was broken (by some individuals), leading to a temporary halt in her work. Eventually, her article was accepted in the most prestigious international journal. Zahra had made a significant breakthrough, but her happiness was short-lived with her untimely death.

"Forensic medical reports confirm the presence of injuries to her abdomen, hip, head, and spinal cord, as well as [severe blows](#) to her liver, kidneys, and a ruptured spleen. Although the building had 13 cameras, the university authorities never provided us with the camera footage. They told the Judicial authorities that the cameras had been non-functional for several months and had not captured any footage.

"Two nights before the incident, Zahra had confided in us and one of her friends, saying, 'I have made a discovery that would win the Nobel Prize in Physics. I fear that if someone finds out, they might forcibly take it from me or otherwise harm me.'"

Suicide or murder? The story of the suspicious death of Zahra Jalilian, an elite student of Tehran University

Webbordishaneh unit, June 13, 1402

• 4

eral •

University of Tehran, family and lawyer of this girl, seven months after the suspicious death of elite student Zahra Jalilian

He didn't and the case of his death should be re-examined by the young man who claims that contrary to the knowledge report, he committed suicide

be placed Zahra Jalilian's family and lawyer in a conversation with Etemad newspaper have a different story about the suspicious death of this

They have been students in the technical faculty of Tehran University

Who is Zahra Jalilian?

Zahra Jalilian was a 32-year-old PhD student in the field of electrical engineering at the University of Tehran.

His suicide was published

Buying all kinds of picnic and travel containers directly from the manufacturer

and buyView

Advertise

In a notification, Tehran University announced the death of this student following his suicide attempt

It was also reported in the news that Zahra Jalilian on December 12 from the top of the Faculty of Electrical and Computer Engineering building

University of Tehran had jumped down and tried to commit suicide, and on 13 Azar due to the severity of his injuries, he was in the hospital

He had died

According to this news, this student discussed with one of his professors about the names that are recorded in the article.

The professor had insisted on registering a person who had nothing to do with the article, but the student had not accepted was and

The professor said that if he does not refuse to register that person, he will harm himself by continuing the discussion with him

Professor, this student committed suicide

The different narrative of Zahra Jalilian's family about her death

In the following, you will read the report of Etemad newspaper about the suspicious death of Zahra Jalilian in a conversation with her family and lawyer

I made a discovery that won the Nobel Prize in Physics. I am afraid that if someone finds out, they will take it away from me by force"...

"Or bring a pillow for me

These words of "Zahra.J", a PhD student in the field of electrical engineering at the University of Tehran, two days before she had an accident.

Is. Zahra was only 32 years old when the news of her suicide became public on December 12, 1401. Officials of Tehran University

They quickly spread the news about this unfortunate incident. Even the guidance teacher of this elite student during Voisi (Sada) in

The virtual space calmly talked about the tragic incident that happened to his student, at the end of his speech

...he said that Mrs. "Zahra.J" said; I am not and he left

The family of this young girl explained to "Trust" that the university published the news very quickly. Zahra committed suicide

No, Zahra's brother says that when the news of my sister's suicide was published, the police did not intervene.

The university authorities have not cooperated with us yet, but the results of the forensic examination and the investigations of our lawyer claim

Rejects suicide

It has been seven months since this shocking incident. Zahra's family is sitting in front of me in black clothes. From

Zahra's mother's eyes are sad. Zahra's mother and brother try to understand each other's words in their conversations

Complete it so that nothing is missed. This report is also based on the type of their conversations

Chapter 1: Referral of the case lawyer from the Head of the Judiciary

Mohammad Jalilian, the lawyer of the late Zahra's parents, tells "Etmad" about this case: "The deceased from"

He was the national capital and one of the elites, inventors and innovators in the field of nanoelectronics, who, relying on individual abilities,

Personal discipline, innate and acquired honesty, perseverance and extraordinary ability in the field of electricity (micro and nano devices)

(Electronics) could have many new words to say in the world. Such as the defense of the treatise

He finished his doctorate and comprehensive exam with an average of over 19.50, as well as refereeing 30 international articles abroad

was responsible for This young and energetic national and global figure, on December 11, 1401 in ISI from the country

30 minutes in the morning, he entered the office vertically, full of energy and full of confidence

And 8 o'clock

30 minutes on the same day with a stretcher horizontally by the emergency forces

And 10 o'clock

He became his own person

at the door

He was directed to the Shariati Hospital on Kargar St., and after hours Mazloumit was

And before his death, the trustees of the university died in haste and without possession of the hospital. In this distance

Reassuring sources, during various interviews, stated that the cause of the accident was suicide, which was rejected by the sources

The reasons for these predictions and presuppositions are mentioned below

Among students, friends and relatives, Zahra Jalilian is a cheerful, athletic, energetic, purposeful, 1-

He was known as committed and religious

In the morning of the next day, 2- the information of the deceased's computer device, showing his efforts until late at night

It used to be spent in the university laboratory for the purpose of developing new inventions and innovations. this

Effort definitely depends on the health of the soul. Such sentiments are definitely the negation of attributional assumptions

It is hasty and cruel to the spiritual personality of the deceased and his oppressed, rural and pure family

and social protests and since the days of this event are parallel to the 16th day of 3- following the events of 26 Shahrivar 1401

It is Azar (Student's Day) and it is assumed that the trustees of the university are afraid to control the crises

Unpredicted and hasty, they instill the hypothesis of suicide in the public opinion, and the reflection of this news causes pressure

This family is oppressed by power. in a way that doubles the sadness of separation

4- of this case from the conversation with the parents and the objective and tangible observations. What is important for me as the lawyer

It is evident that the hypothesis of suicide by the deceased is ruled out. This Iranian elite girl,

There have been many invitations and e-mails sent from Europe that Al-Qaeda all these evidences, indicating identification

This national capital by foreign countries has been more than domestic scientific centers

According to the information of Dem's parents, emails from warring countries were sent to his personal laptop, and the hypothesis of his murder is 5-

It can also be checked by external elements

Forensic medicine theory, criminal police reports also negate the hypothesis of suicide 6-

Since the place where the murder took place was in the technical faculty of Tehran University and this place is equipped with CCTV cameras 7-

The only report that was sent to the judiciary by CCTV cameras is related to the entrance door

The deceased enters vertically and with his feet energetically and his body horizontally by external forces

can be Unfortunately, it was rejected with consecutive visits to the family of the victim Mazloun in order to inquire about the process

They have been hit in the chest, so that with the formation of the self-proclaimed truth-seeking committee of the university, until now, an invitation from the lawyer and

It is not intended for parents to express their positions

The trustees of the university, without conducting any research and investigation, published a default during the interview at the community level 8-

They tried to prove their hypothesis

In the end, I, as a lawyer, who has handled such criminal cases for many years as a judge

He has taught related specializations with attention to all aspects, especially in the position of a teacher in the field of murder

Observing the suspicious manner of the deceased's death, I consider the occurrence of this incident to be a mysterious and complicated murder that requires a tool

And rejecting the suicide hypothesis in general is more extensive and efficient in order to root the issue and discover the truth

And I will appeal, issue special orders in this regard. From the minutes of the head of the judiciary regarding fair proceedings

It is supplication. Mr. Shafiei, the investigator of Branch 5 of the Criminal Prosecutor's Office, has so far tried hard and diligently in the expected direction

It had this purpose

The second chapter: the rank of a doctorate in the field of nanoelectronics

Zahra's mother: "My daughter was 32 years old. He was the third child of the family and very intelligent. Several times from different parts of the world

He offered to cooperate. However, Zahra did not like to go and always told us; I want to stay in Iran and

"I will serve my country. My daughter majored in physics at the university. Until he decided to change his field of study

Zahra's brother: "My sister is studying in the field of nanophysics, but she has decided to enter the doctoral entrance exam

"Nanoelectronics to participate."

Zahra's mother: "Once we saw that she filled out the notebook for the doctorate exam without taking time to study.

rank and went to Tehran for an interview. He participated in the entrance exam. Later, he was accepted in the doctoral course of Tehran University with the first

went. He came out of that interview proud, but we don't know why Shabana was ranked (the second time). After a year, again

He participated in the entrance exam. was saying; I don't want to pay tuition, many students rank lower than me and daily

And They were accepted. Therefore, he participated in the entrance exam again the following year. This time he won first place with a grade point average of 19

He completed 58 percent of general doctorate courses. All that was left was the approval of his article. Thirteen times he for Zahra's article

And in the middle of work, he told my daughter; No! I do not accept this. This was when my daughter gave the article to the subject

"He had done it and he had reached a conclusion

Zahra's brother: "He would give Zahra the papers that other students couldn't do so that she could find the blind spots in the paper."

Slow. When he found the blind spots, he took the article back from him and gave him a new topic

He went to university. Then he started talking to Zahra's mother: "Until the thirteenth time!" For the thirteenth time, Zahra complained to the boss

doing nature on the article that was suggested to him. He intended his article for the journal

"Submit (send) slow communications

Zahra's brother: "The articles that caused this to happen. His teacher had told him; The topic you want to work on

Kenny, it's a dangerous thing. As far as Zahra understood the danger and days before the accident with Snape

she invented herself was coming. Within 9 months, my sister went to university with a device, a dormitory, and a transistor that

He had done it, he completed the project efficiently. The title of the article was "cultivation of antimony materials". Articles that

They agreed that no changes will be made in the middle of the work and Zahra will work on the same issue. On the other hand, they are responsible

They did not let Zahra do her job easily. They always kept the stick spinning and harassed him. Example material

They did not provide him with a laboratory or limited his time to work with the machine. relative to the project

They tried not to give him too much value. He could only work for two days with the heavy equipment he was carrying.

to work Zahra explained; They had given a letter that only in the presence of Mr. or Ms. [...] he can use the devices

to work This issue caused other students to take a stand against Zahra. One day Zahra one

And he was waiting to get the result of the test when he suddenly put one of his laboratory samples into a machine

laboratory and took out Zahra's test sample and put his own test sample inside One of the students entered the

put the device This made Zahra complain why this student should allow himself to do this

to behave, but instead of being supported, he was humiliated. About ten, fifteen days

He was fired from the laboratory. We do not know why they prevented Zahra from entering the laboratory. Even work somewhere

It was received that they requested to cancel Zahra's accommodation from the dormitory. With the conclusion that Zahra is aggressive. summary

"These harassments continued until the submission of the article

article has been submitted

Chapter 3: The

Zahra's brother: "At the time of submitting the article, the work was often delayed and Zahra was very upset about this.

Finally, after two months, the article was submitted. Zahra's name had no problem with this, but all the work of the article

He had done it himself

I had talked to Zahra two days before my accident and she said; I don't want Haqalnas to be on my neck. Some

Senior students are introduced in some articles to help PhD students, and even their names are taken from them

It is not possible, but Zahra believed that that person worked hard for parts of the article and his name should be mentioned. that's mean

"The news that was published in the media about the last day's conflict over the name of this gentleman was completely false.

Chapter 4: Tell about the incident

intends to And Zahra's mother: "The night before the accident, Zahra called us and was very happy. He said the article has been submitted

"Come to Kermanshah for a few days' vacation. Then he said he bought me a coat, perfume, etc

Zahra's brother: "He had a plan." Yalda was nearing night and wanted to be with us

Zahra's mother: "On the morning of the incident, she invited three of her friends to the restaurant for lunch."

"Zahra's brother: "as the sweetness of submitting the article

Zahra's mother: "Virtual exams were held that day, and from that moment on, when Zahra entered the building, she was no longer with us

said; You do not know what happened to Zahra. Until 11 o'clock on the day of the incident, a lady called me and

Are you Zahra's mother? I said; Yes. said; Zahra has fallen. Get there as soon as possible. I was afraid. I asked; that's mean

Fallen? Where did it come from? how did it happen said; The lady fell from the stairs of the university. I didn't know if it was night or day. what

I was sick. My son called his father to go to Tehran. I called our relatives to come to Tehran

Go to the hospital and see what happened... Zahra was transferred to Shariati Hospital. We will arrive at 6 o'clock

We arrived in the afternoon. We were in a bad mood, both me and the whole family. I begged the hospital staff to help me

My child, let's go." (tears)

Zahra's brother: "On the day of the incident, one of the cameras that was in front of the entrance of the building showed the image of Zahra entering

He recorded his mentor. The only video they gave us from the CCTV cameras of the University of Tehran was the moment we entered

It is them. Another moment that the cameras recorded; There is a moment when rescue workers enter the building and

And half to two hours of movies are available to us, they take out my sister's stretcher. About an hour

has not taken The building that Zahra entered was a four-story building. The camera that recorded the videos on the floor

It is on the ground floor. About 10 meters before the entrance of the building, there are two corridors. Corridor to the right somewhere

It was where Zahra's room was located. There were two cameras in the corridor where Zahra's room was located. one of

The cameras were in front of Zahra's room and the other camera was at the end of the corridor. These two cameras cover each other

were giving The laboratory in which the corridor is located is the most equipped laboratory in Iran. One of the most important and

The most equipped nanoelectronics laboratories in Iran. Therefore, the building must have a lot of security

Chapter 5: Cameras movie

Zahra's brother: "The issues that exist are that security and university officials say; Film cameras

we don't have There is no witness to testify that Zahra committed suicide. There is a room next to the entrance of the building

Security forces are there. The security force also says; At that moment, he was not in his room and went to another floor

The tea had gone. Everything has gone hand in hand to declare without any evidence; My sister is from the ground floor

And because of this, he threw himself into the basement. The height of the ground floor to the basement is almost three meters. Zahra is 165 tall

Are you all hit? Forensic reports show that the spleen was ruptured. Spleen is not a part that

Easy to be hit or torn. The project that Zahra was working on was a very important project. Although Zahra

He was also active in other projects. Of course, we believe that Zahra was murdered and we have no doubt about it.

And the person or persons who committed this act has not been identified for us. According to reports, only the cause of murder

Forensic medicine has scratches on my sister's hand, but the university does not intend to specify the matter

The university has not cooperated with different organizations ".. and so far no cooperation from

Zahra's mother: "The lawyer of our case has completely rejected the issue of suicide with his investigations.

Why did they publish the news of suicide in the media so quickly after this incident? Also on the most important days of the year

In the past (1401) when students and some people had gatherings. Should the university be without any document of suicide?

Was Zahra supportive?

Zahra's brother: "Fingerprinting was not done from the stage, the stairs and my sister's room. Even under Zahra's nails

They didn't take samples to see if there was a conflict? The university announced very quickly that Zahra had committed suicide

Judicial authorities do not investigate the matter as they should. After six months of doing nothing, the police and

and told us; I saw Zahra walking down the stairs from the students who refused to testify, a student came

We do not know any information from inside the laptop ^{and} threw. Zahra's equipment and laptop were delivered to us after a month

"Out or not! We tried to send letters to all the organizations. Even to the judiciary. We hope to get an answer

Final Chapter: When we take it all back

Zahra's mother arranged the names in which some details are mentioned, but the letter was written by Zahra's brother as follows

.Reads

We have two sons, but with the birth of Zahra, it was as if God had given the world to me and her father. Our daughter is one seed from the same

problems from doing something desperate as ~~Amby was~~ extremely smart. We never remember his hardships and

has done upside down; As the obstacles got bigger, he tried harder. He for his thought and action

He valued a lot. He never participated in entrance exams and reinforcement classes and was always an excellent student in the class. So

After successfully completing his master's degree, he was able to complete the field of solid physics. With the help of Prof

Moradian wrote a book entitled Dangers and Applications of Radioactive Elements. He also wrote several scientific articles. At

The same master's degree received names from the most prestigious international publication as being accepted as an editor.

And in the field of nanoelectronics, he could have participated in the field of solid physics without an entrance exam, but he passed the entrance exam

It was accepted with a rank of one. In recommending the names that Professor Moradian wrote to Tehran University to introduce Zahra

35 ^{And} was introduced by the global elite. He was able to finish his PhD in nanoelectronics in three semesters

Judge the global article. During her PhD course, her supervisor stopped and changed Zahra's scientific research thirteen times

gave Does everyone in the world treat their elites like this? until finally his article was approved after much controversy

And he was unable to solve it. August, 1400 articles by Zahra with a topic that all the scientists of the world had a challenge on

were left, it was approved, but even after that, the situation did not progress on Murad's endowment and the device with which Zahra

this caused his work to stop for a while... Finally, his article in He was analyzing his samples, they were broken, and

He had reached an important point, but his happiness was soon accepted at the end of the world's most prestigious publication with his death. Zahra to discover

Receipt. Forensic medicine shows the effects of blows to the abdomen, sides, and strong blows to the head and spine, as well

Strong blows to the liver and kidney and rupture of the spleen are confirmed. That building has 13 cameras, but university security

And they told the judicial authorities that the cameras had been damaged for several months, but they never showed us the footage of the cameras

And one of his friends said: "I discovered that they were a prize and they did not take a video." Zahra to us two nights before the incident

"He gets the Nobel Prize in Physics. I am afraid that if someone finds out, they will take it from me by force or throw a pillow over my head

Dr. Zahra Jalilian dies in suspicious circumstances in Tehran

December 8, 2022 in Women's News

Share on Facebook

Share on Twitter

Share on LinkedIn

An elite Ph.D. student was killed at Tehran University by security services on December 4, 2022, according to social media reports. Dr. Zahra Jalilian, 30, studied Electrical Engineering at the School of Technology.

The circumstances of her death are suspicious; the authorities of Tehran University said she had committed suicide due to differences with her professor over the publication of her article. Social media reports, however, said she had been arrested during protests in Tehran and killed by IRGC forces under torture.

Dr. Zahra Jalilian's family is under pressure to declare she committed suicide. But they say she had recently received a scholarship from Germany. Dr. Zahra Jalilian was full of a love of life and sciences and enthusiastic about continuing her education.

Zahra Jalilian (left) and her funeral ad
